[OATS Aging Connected 2025 Report](#)

Every year, more older adults are gaining access to the resources they need to stay connected through Senior Planet. In our Aging Connected 2025 Report, we found that though the digital divide has become smaller, 32% of older adults still do not have access to broadband internet at home. We are working to raise awareness of this remaining gap in order to make sure that all older adults who want to be are connected to the tools and resources they need to make daily tasks easier.
