

2016 EHR Selection Matrix

Disclaimer

The information included in this paper is meant to assist care providers in the understanding and selection of Electronic Health Record (EHR) systems, but cannot possibly include all systems that may be available. Products mentioned in this paper serve as illustrative examples. Information about the functionalities and capabilities for this effort were provided by participating vendors of EHR systems. A few EHR vendors chose not to participate. Functionalities and capabilities of listed EHR products have not been verified, tested, independently evaluated or endorsed by LeadingAge or LeadingAge CAST. Please use this as general guidelines in understanding functionalities and examples of current EHR systems. The EHR Matrix may help providers identify potential EHR solutions that may meet their requirements, and is intended to help them target vendors to submit a Request for Proposal (RFP). Where appropriate, provider case studies were identified and published separately. However, providers are strongly advised to verify functionalities of the EHRs prior to final selection through demonstrations, site visits, reference checking and other due diligence steps.

Additional Assessments

Additional Assessments	Customizable Assessments	List Additional Assessments
ACMS by New Tech Computer Systems www.newtechsys.com	Yes	User Defined Assessments allow users to build facility unique assessments accessible anywhere in the application. System includes 40+ assessments for Social, Dietary, Activities, Therapy, and Nursing.
ADS Data Systems www.adsdatasystems.com	Yes	Assessment tools can easily be customized. Several assessment tools already exist.
American Data www.american-data.com	Yes	Unlimited and all are mobile.
American Healthtech www.healthtech.net	Yes	Customizable assessments/forms with common industry tools pre-loaded, including evidence-based tools; Braden Risk, PHQ-9, BIMS, Pain tools, etc.
BlueStrata EHR bluestrataehr.com	Yes	Library of standard assessments are readily available and customized assessments can be added.
Cerner www.cerner.com	Yes	A robust clinical evaluation catalog including LTC specific documentation. Also the ability to design custom forms through a tool or for fee for service.
ChartPath© Clinical Charting for PAC/LTC www.afoundria.com	Yes	Evidence-based Clinical Practice Guidelines.
gEHRiMed EHR for LTC Medicine www.gEHRiMed.com	Yes	Dozens of existing templates and all LOINC Taxonomies.
Health Care Software, Inc. (HCS) www.hcsinteractant.com	Yes	HCS's comprehensive library of multidisciplinary assessments is available with the flexibility to edit or create custom – a single point of entry for all pertinent daily documentation for the care staff allowing the data to flow into and from the appropriate EMR locations with organizational defined logic. Bidirectional flow of data eliminates duplicate entry; data within the correct look-back periods is linked and available to support MDS and LTCH coding; alerts for high-risk events flow directly into the application (for e.g. 24 hr. report, I&O, Vital Signs, medications) which can also feed into assessments creating a streamlined user experience.
HealthMEDX www.healthmedx.com	Yes	HealthMEDX delivers a full complement of standard LTPAC assessments, while our comprehensive implementation strategy allow configuration of the platform to meet unique needs within organizational processes of the user base.
